**Introduction**

The IRS has published final regulations that include new tables for use in figuring required minimum distributions. The new tables replace Tables I, II, and III in Publication 590. This supplement contains the new tables in their entirety.

You can use these new tables to figure your 2002 required minimum distribution, or if you prefer, you can use the tables in Publication 590.

**New Life Expectancy and  
Uniform Lifetime Tables For  
Use in Figuring Your Required  
Minimum Distributions**

The following three tables can be used in place of Tables I, II, and III near the end of the 2001 issue of Publication 590. For information on whether or not you must figure and take a required minimum distribution, and if so, how to use these tables, see *When Must I Withdraw IRA Assets?* in chapter 1 of Publication 590, *Individual Retirement Arrangements (IRAs)*.

*Table I* is for use by beneficiaries. *Table II* is for use by owners who have spouses who are more than 10 years younger. To use *Table II*, locate one spouse's age on the vertical axis and the other spouse's age on the horizontal axis. The number that is at the intersection of the two ages is the joint life and survivor expectancy number for those two ages. *Table III* is for use by owners who do not have spouses who are more than 10 years younger.
