RESEARCH

# Background & Purpose

---

- Each year, the IRS conducts customer satisfaction research among its two main *e-file* marketing targets and their key sub-groups:
  - Taxpayers -- both Non-Users of *e-file* and specific types of Users.
  - And Tax Preparers -- again, both *e-file* Users and Non-Users.
- There are two main objectives to this research:
  - To track levels of customer satisfaction with *e-file* products.
  - And to capture diagnostic information about each product, along with User and Non-User ideas about how these products can be improved.
- Following are findings from the 2003 wave of the research, with a comparison to findings from the surveys conducted in 2000, 2001 and 2002.

# Methodology

---

- Like previous waves, this study was conducted by telephone from RMR's national phone center in Wayne NJ. The study was conducted during the period of April 16 to June 6, 2003, and included:
  - Taxpayers -- First, we secured a nationally-representative random sample of 1,000 18-64 year-old, employed, 2003 Taxpayers, using an RDD sample of listed and unlisted telephone households. The purpose of the random sample was to provide a representative base of both e-file Non-Users (~500, allowing ~170 evaluations of non-usage of each *e-file* product) and e-file Users -- with Users then augmented (from IRS lists) to provide at least directionally readable sub-samples of...
    - ~500 Users of each e-file product -- Practitioner *e-file*, On-Line Filing, and TeleFile.
    - 100 Free File Users (via an augment of those found within On-Line Filing).
    - 100 Spanish-Speaking Taxpayers in the Practitioner e-file and On-Line Filing User groups.
  - Preparers -- We also secured nationally-representative samples of ~500 e-file Users and ~500 Non-Users -- all qualifying as active tax return preparers in 2003.
    - In addition, separate samples of 230 H&R Block Preparers and ~200 Jackson-Hewitt Preparers were secured to determine levels of satisfaction with *e-file* among the Big Two -- which have historically been excluded from *e-file* research, but may be included in the future.

# Detailed Findings Among Taxpayers

Among Taxpayers  
Who Currently Use  
*e-file* Products**

User Satisfaction  
With *e-file* Products

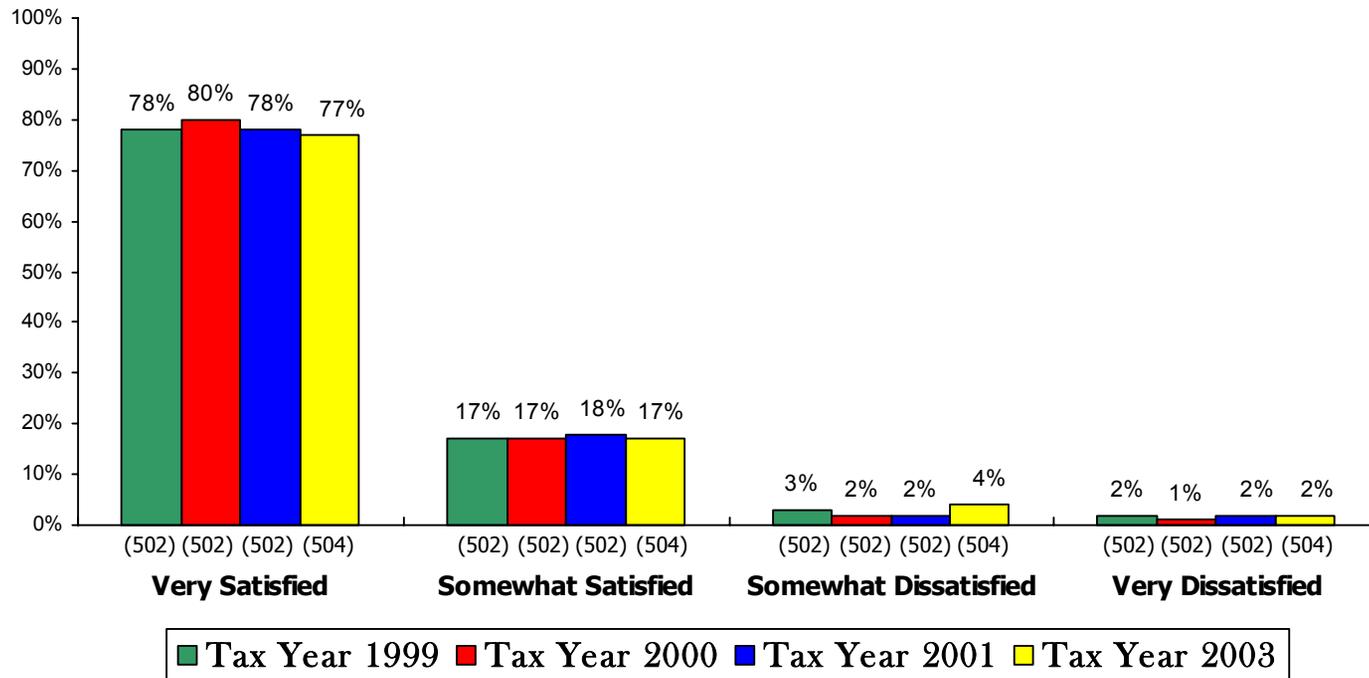

Russell  
MARKETING  
RESEARCH

## Satisfaction With Practitioner *e-file*

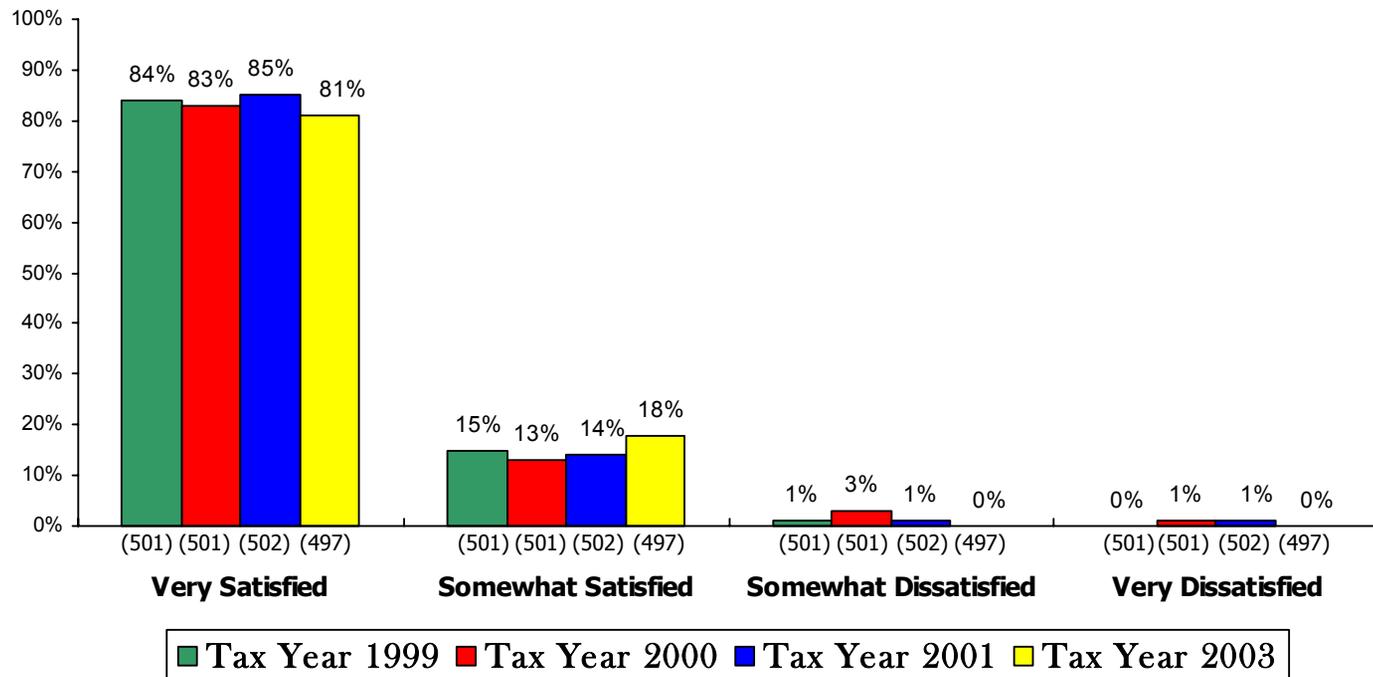

- First, 2003 results show continuing high satisfaction among Users of *Practitioner e-file* (referred to in the survey as “*Electronic Filing Using A Tax Professional*”), with no significant changes in the high ratings of this product across the past four years of tracking.

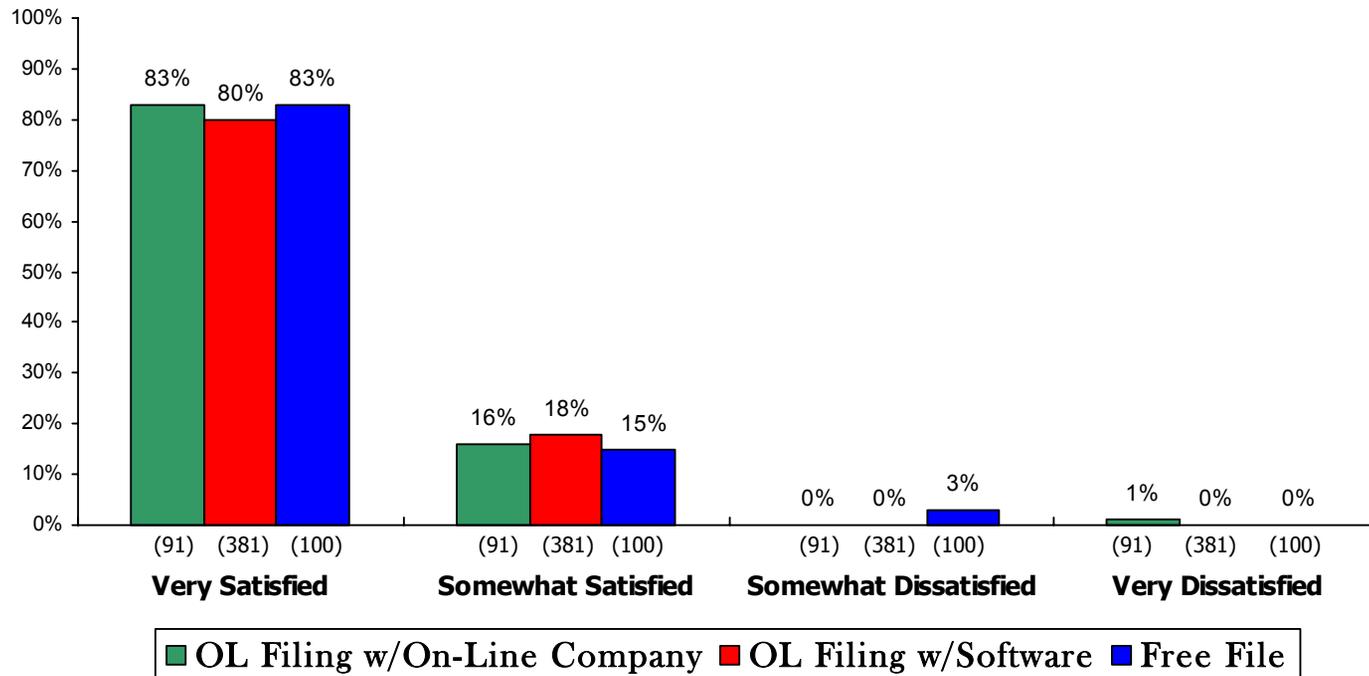

## Satisfaction With On-Line Filing (Total)

- Among Users of On-Line Filing, we see a slight decrease in the top-box “very satisfied” rating of that product from last year’s high of 85%, though this rating is still high at 81% (and still stronger than that of Practitioner *e-file*), and with virtually all Users still either “very” or “somewhat” satisfied.

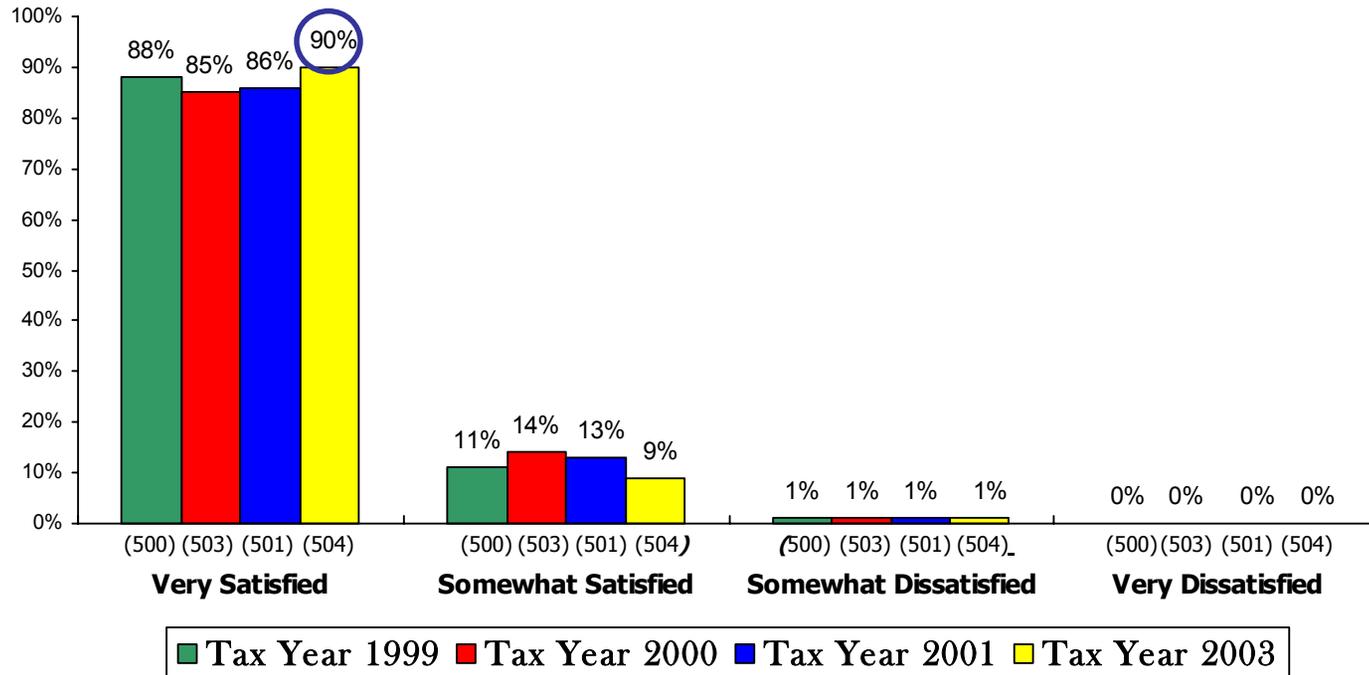

## Satisfaction With Specific OLF Products (2003 Only)

- For the first time in 2003, we captured satisfaction levels for the three specific On-Line Filing products – On-Line Filing with an On-Line Company, On-Line Filing with Software, and Free On-Line Filing (or Free File). Among Users of each product, 80%+ are “very satisfied” -- with virtually all either “very” or “somewhat” satisfied.

## Satisfaction With TeleFile

- Meanwhile, the percent of Users of TeleFile who are “very satisfied” with that product actually increased and is now at the 90% level.

# Satisfaction Levels Among Market Segments

---

- **This year, for the first time, satisfaction data can be analyzed by market segments identified in the Attitudinal Tracking Study:**
  - ♦ **Return Type segments (Self-Simple, Self-Complex, Paid-Simple, Paid-Complex)**
  - ♦ **Tech Acceptance segments (Leaders, Followers, Laggards)**
  - ♦ **e-file Attitudinal segments (Believers, Skeptics)**
  - ♦ **And Other Special segments, specifically, V-Coders, Lapsed e-file Users and Spanish-Language Taxpayers.**
- **However, base sizes among the ~500 Users of each product (from whom satisfaction data is obtained) are limited in some of these segments, leaving us with readable satisfaction data only among the Return Types, Tech Acceptance segments, and Spanish-Speaking Taxpayers.**

## Satisfaction By Return Type Segments

- There are no notable differences in the top-box satisfaction ratings (% “very satisfied”) across the Return Types using each product -- and thus no “red flags” around the performance of any *e-file* product among any individual group.

	-----Return Types-----			
	Self-Simple %	Self-Complex %	Paid-Simple %	Paid-Complex %
<b><u>Top Box Satisfaction Levels For...</u></b>

# Satisfaction By Tech Acceptance & Spanish-Speaking Segments

- There are directional differences in satisfaction by Tech Acceptance, with Leaders and Followers more satisfied with Practitioner *e-file* and with Leaders rating OLF higher. TeleFile Users in each segment are about equally satisfied with TeleFile.
- Spanish-Speaking Taxpayers are directionally more satisfied with OLF than other Users, but less satisfied with Practitioner *e-file*.

	----Tech Acceptance Segments----			Spanish-Speaking %	Total Users %

Russell  
MARKETING  
RESEARCH

## What Users Like About Each e-file Product

- As in previous waves, virtually every e-file User can tell us something they like about the product they use. Top strengths continue to be:
  - Speed (in filing and in refund)** for Practitioner e-file.
  - Ease/convenience** and then **speed** for On-Line Filing.
  - And **ease/convenience** followed by **speed** for TeleFile.

# What Users Like About The Specific On-Line Filing Methods

- Focusing just on the three On-Line Filing products, we see that (as with OLF in general) all are “liked” mainly for their *ease/convenience*, followed by their *speed* (especially Free File).

BASE:	OL Filing With On-Line Company TY 2003 Only	OL Filing With Software TY 2003 Only	Free File TY 2003 Only

## Can The *e-file* Products Be Improved?

- While satisfaction ratings and specific likes are high, there is still some room for improvement of each *e-file* product -- with about one-fourth to one-half of the Users of each product saying there is something about the product that the IRS could improve.

# So, How Can The *e-file* Products Be Improved?

- **Specific suggestions for improvement vary by product:**

- For Practitioner e-file, the main suggestion is to *make it less expensive*.
- For OLF, top needs are *lower cost, better instructions, and generally more simplification*.
- For TeleFile, the top mentions are to *expand qualification and better instructions*.

BASE: Total Users Saying Filing Method Can Be Improved	Total <u>EFUTP</u> Users				Total <u>On-Line</u> Users				Total <u>TeleFile</u> Users

# And How Can The Specific OLF Methods Be Improved?

- For the three products within On-Line Filing, while base sizes are sometimes small, the top suggestions are:
  - For both OLF With An On-Line Company and OLF With Software: *lower cost, speed up the process, provide better instructions, and generally more simplification.*
  - For Free File: *provide better instructions, more simplification, and speed up the process.*

# Product Ratings

● **Another way to assess product performance is through User ratings of satisfaction with various product dimensions. These show:**

- High satisfaction for all products in terms of accuracy, filing speed, ease of use (though less so for Practitioner *e-file* and OLF), comparison to other filing methods, refund speed (up this year for all three) and privacy/security.
- And lower satisfaction with (or lower recognition of) the electronic payment option for all products, along with low ratings of Practitioner *e-file* and OLF on length of tax package and cost (especially this year).

## Specific OLF Product Ratings

- **Looking at the same ratings for the three OLF products, we see the same general strengths and improvement needs, though with these distinctions:**
  - OLF With An On-Line Company has notably higher ratings on refund speed.
  - While it and OLF With Software are both rated lower in terms of cost.
  - OLF With Software also has notably low ratings in terms of length of tax package.

User Recall & Perceived  
Helpfulness Of IRS Publications,  
Forms and Instructions

Russell  
MARKETING  
RESEARCH

# Recall & Helpfulness of IRS Publications/Forms/Instructions

- Recall of IRS pubs/forms/instructions remains at low levels for both Practitioner *e-file* and OLF -- which is not surprising, since Users of these two methods do not receive method-specific materials from the IRS. Among TeleFile Users, recall and perceived helpfulness of IRS materials are still strong.

BASE:	<u>Total EFUTP Users</u>				<u>Total On-Line Users</u>				<u>Total TeleFile Users</u>

# Our First Look At Free File Usage

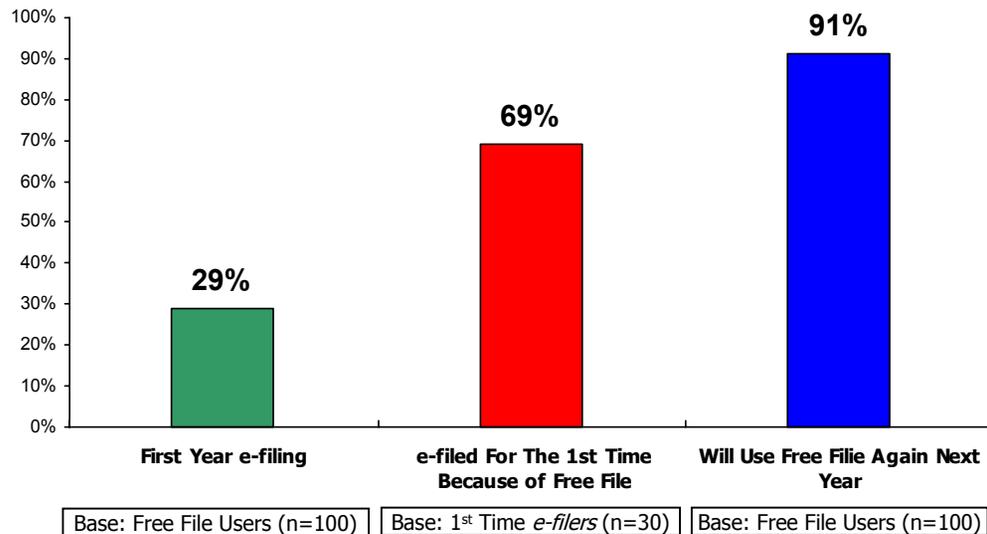

Russell  
MARKETING  
RESEARCH

## Free File

- **This year, for the first time in Customer Satisfaction Tracking, we interviewed a sampling of Free File Users and found that:**
  - 29% of them say this was the first time that they had *e-filed*, with two-thirds of these saying they *e-filed* for the first time because Free File was available.
  - Importantly, 91% say they will use this method again next year.
  - They learn about Free File mainly on-line or through word of mouth.

# Repeat Usage & Migration

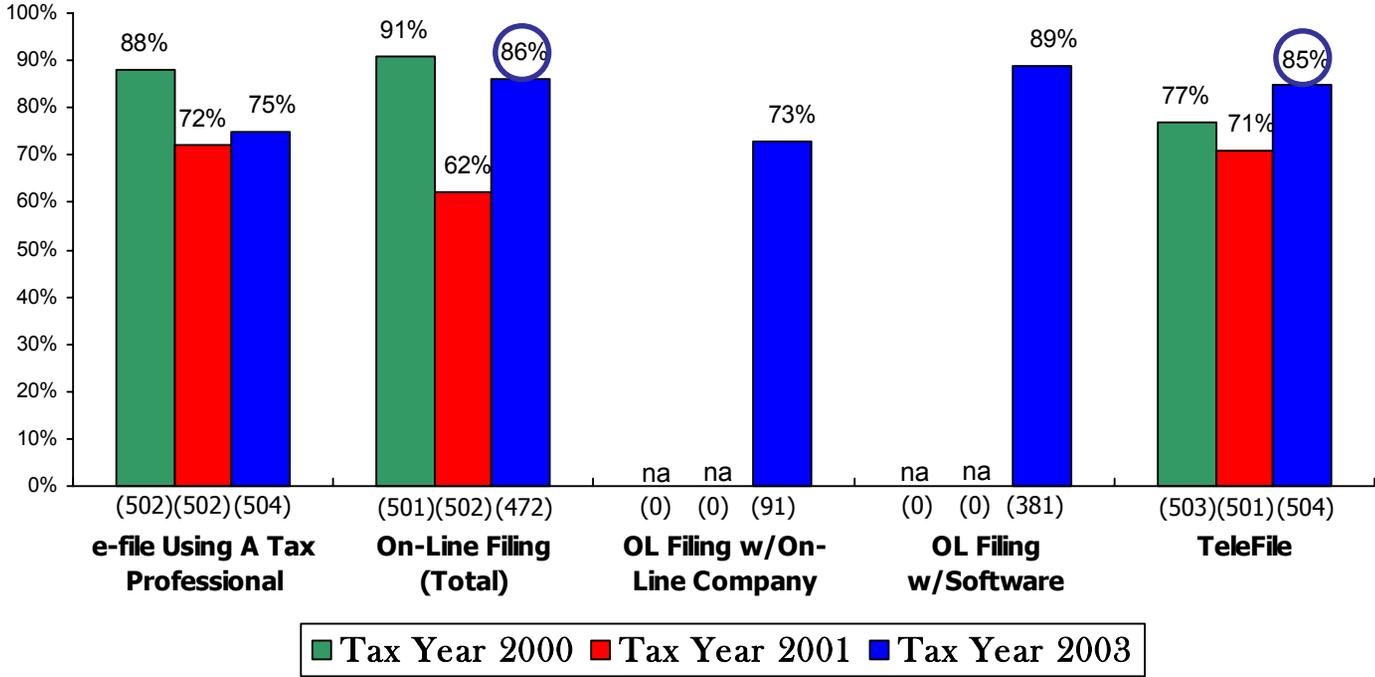

Russell  
MARKETING  
RESEARCH

# Repeat Use of Specific *e-file* Products

- Claimed repeat usage of all *e-file* products increased this year (and significantly so for OLF and TeleFile), following decreases for all products in last year's study.**

# Why Don't TeleFile Users Migrate To Other *e-file* Methods?

- **Similar to past years, they like TeleFile and feel that...**

- *Practitioner e-file costs too much and their tax situation doesn't justify paying for it.*
- *And On-Line Filing requires a PC that they don't have access to and they're concerned about its security.*

**Detailed Findings  
Among Taxpayers Who  
DO NOT Currently Use  
*e-file* Products**

Russell  
MARKETING  
RESEARCH

Likelihood Of Use Of *e-file* Among Non-Users

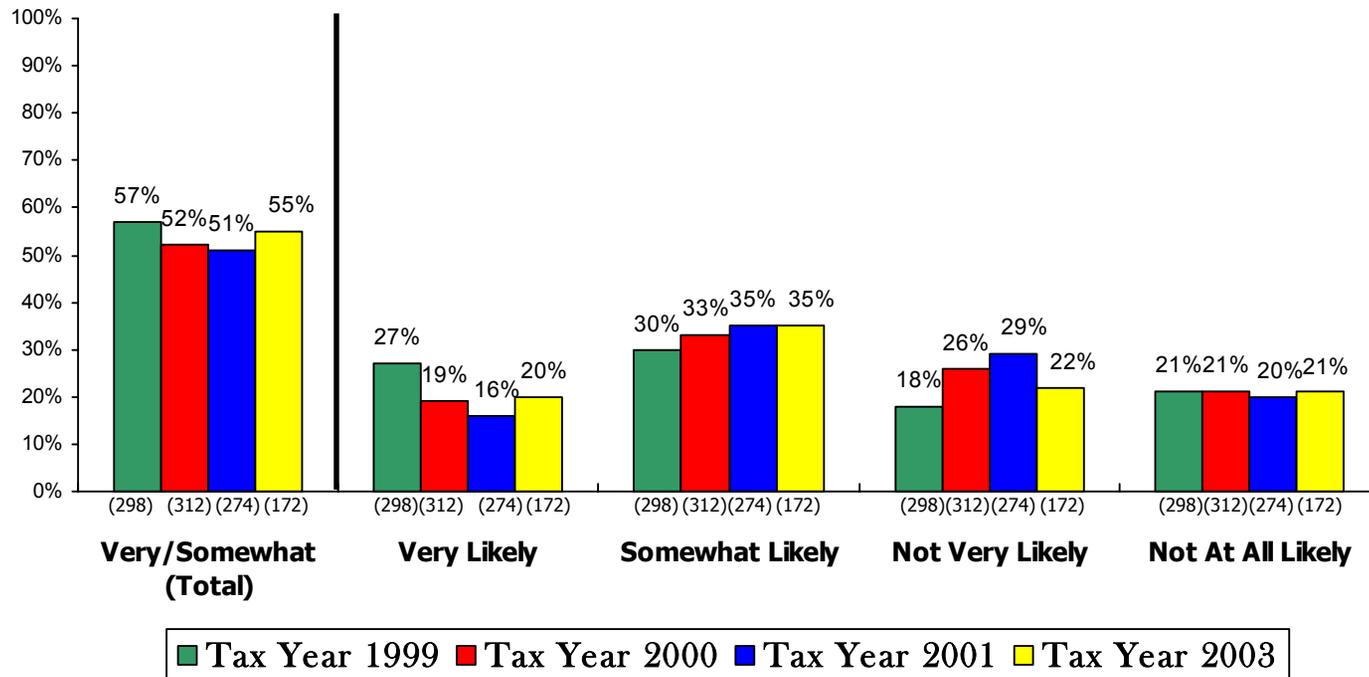

Russell  
MARKETING  
RESEARCH

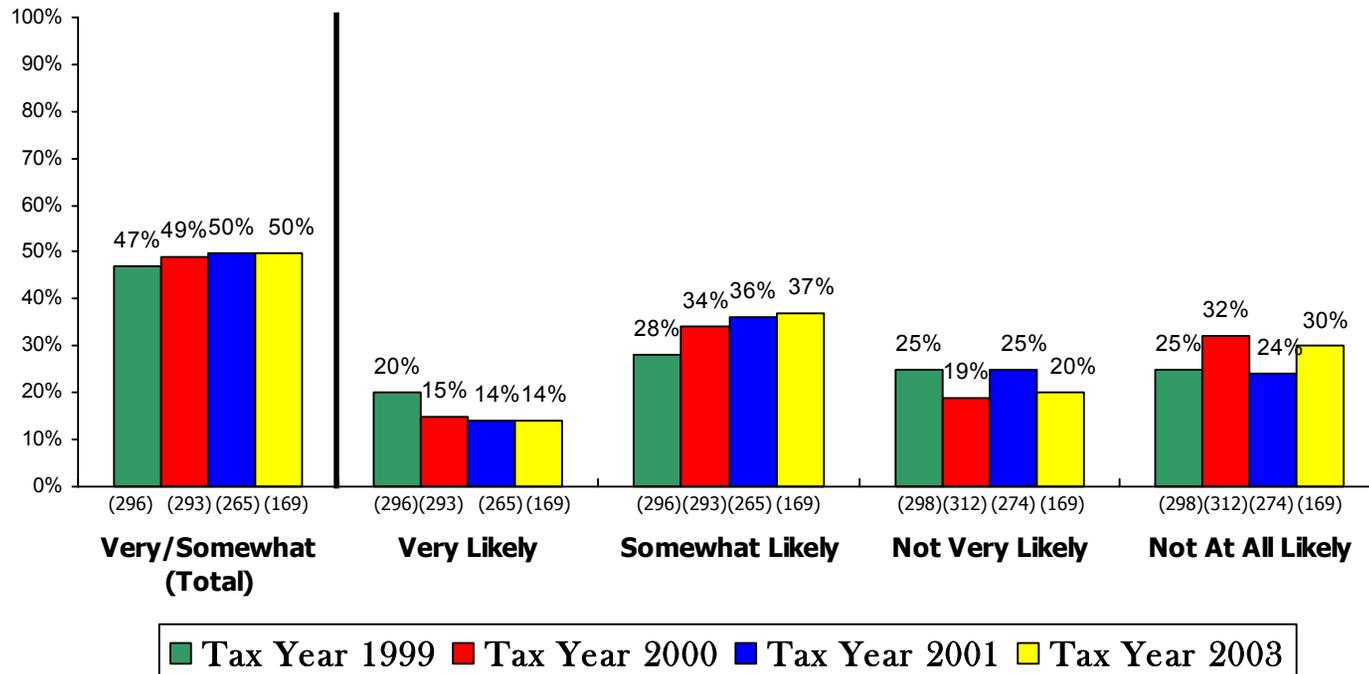

## Likelihood Of Using Practitioner *e-file*

- Each year we expose qualified Non-Users to descriptions of the *e-file* products and ask their likelihood of use. For Practitioner *e-file*, the proportion of Non-Users saying they would be “very” or “somewhat” likely to use reaches 55% this year -- after having been slightly lower in the past two years.

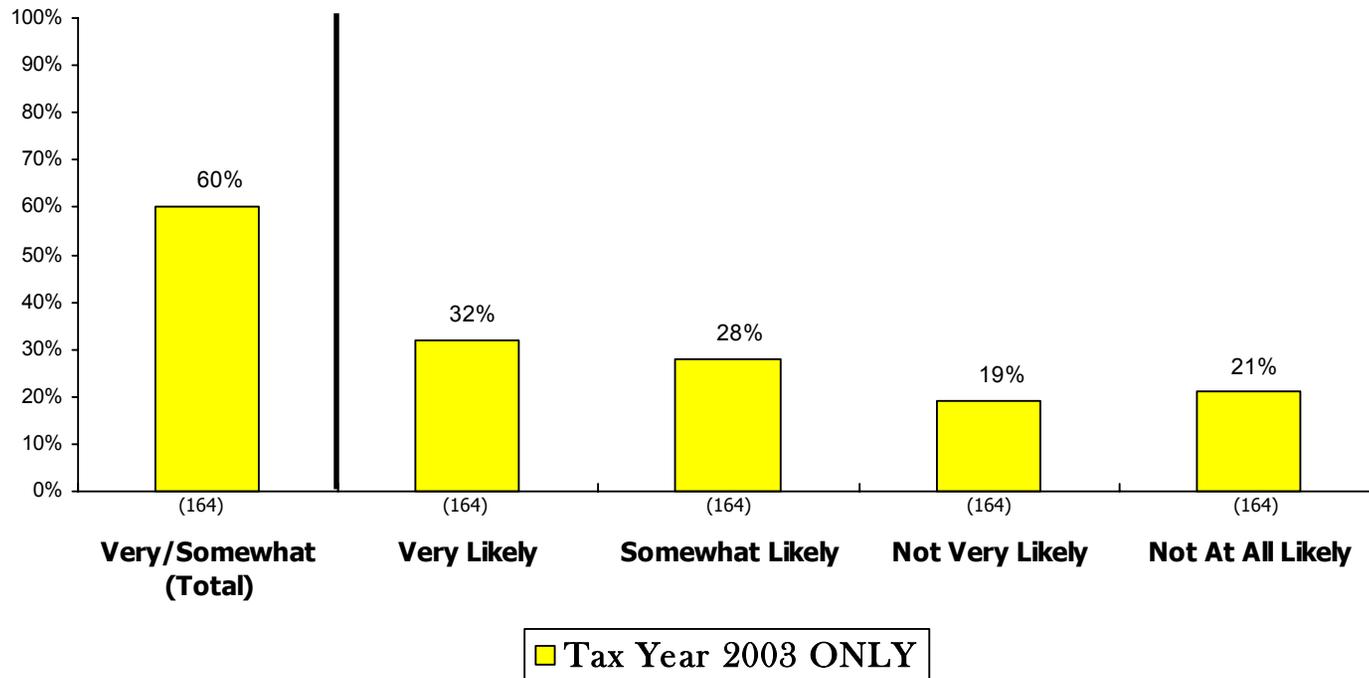

## Non-User Likelihood Of Using On-Line Filing

- For On-Line Filing, likelihood of use is unchanged at 50%.

## Non-User Likelihood Of Using Free File

- In past years, the third ETA product covered here was TeleFile, but it was replaced in the Non-User evaluation this year by Free File. This product has likelihood of use of 60% -- higher than that of Practitioner *e-file* (55%) and On-Line Filing (50%).

Non-User Reasons  
For Not *e-filing*

Russell  
MARKETING  
RESEARCH

## Non-Users' Top Reasons For Not *e-filing*

- **With 50% or more of the Non-Users saying they are likely to use each *e-file* product, we look at their main voluntary reasons for not using *e-file* to see what's preventing them from using it. Unlike past years, we see no outstanding barrier here -- the top mention is "doesn't apply to my tax situation" (at just 15%) and there is significantly lower mention this year of being *more comfortable with paper* filing methods.**

# Post-Exposure Perceptions Of *e-file* Among Non-Users

- **Non-User ratings of each product (based on the description we read) show that while they're very accepting of the idea of Free File, they have concerns about the other products -- specifically, concerns about...**
  - *Practitioner e-file being better than other methods and its cost.*
  - *And OLF's ease of use, privacy/security, and being better than other methods.*

## Were Non-Users Given The Opportunity *e-file* By Their Tax Pro?

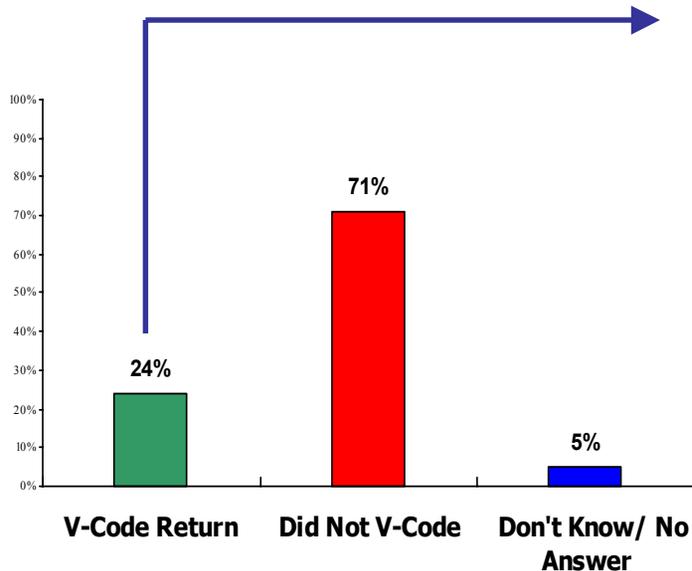

- This year, for the first time, we asked Non-Users who had gone to a Preparer whether their Preparer offered them the opportunity to *e-file*. Over half say they were not offered *e-file*, while 31% *were* offered the opportunity to *e-file*, but turned it down (the rest did not recall).

Base: Total Who Filed A Paper Return Using A Tax Professional (n=281)

# Why Are V-Coders Not Taking The Extra Step?

- Among Self-Paper filers, 24% were V-Coders (off a bit from the 28% in 2002). Though base sizes are small, we see that V-Coders' top reasons for not transmitting electronically are similar to those of last year – *cost concerns, preferring paper and mail, privacy/security concerns, and not thinking of e-file.*

Base: Total Who Self-Filed A Paper Return (n=224)

# Non-User Awareness & Trial of Free File

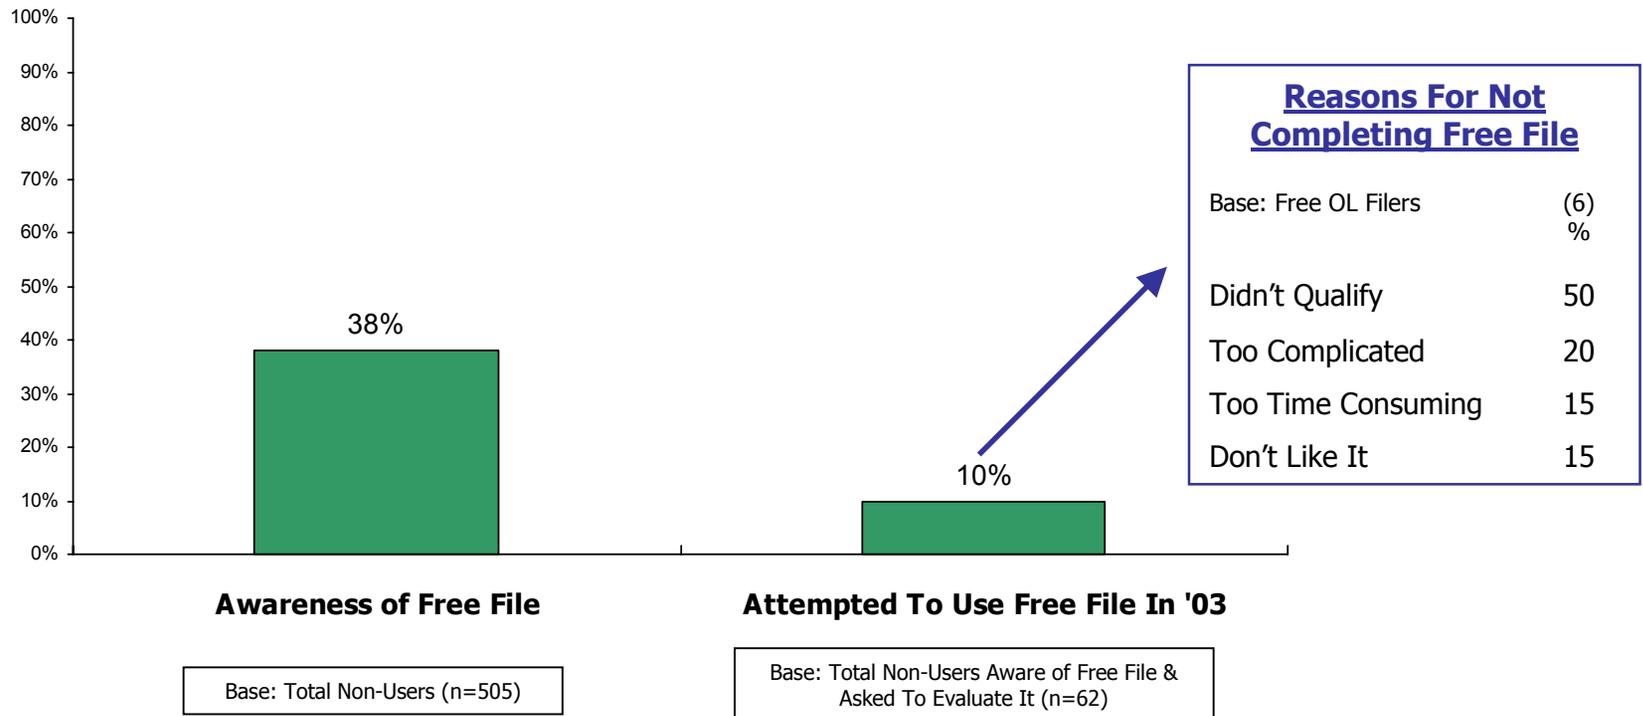

Russell  
MARKETING  
RESEARCH

# Awareness & Attempted Trial Of Free File Among Non-Users

- **38% of Non-Users were aware of Free File at the time of the survey. Among those aware and asked to evaluate Free File (just 62 people), 10% (or 6 people) had attempted to use Free File this year but did not complete the process (with 3 of them saying they found they did not qualify).**

## Possible Barriers To Free File

- Those 62 people aware of and asked to evaluate Free File were asked why they chose not to use the product. The top reasons (highlighted below) relate to a preference for or greater comfort with another method and finding that Free File is not applicable to them (they did not qualify or their return was too complex).

# Internet Access

- We also look at Internet access year-to-year and among Users and Non-Users. This year's results show continued growth in Internet access among Taxpayers, with virtually no difference here by Users vs. Non-Users (which tells us that lack of access is not a main driver of non-usage).

BASE: Total Respondents	-----Total Random Sample-----				Tax Year 2003	
	TY 1999 1000 %	TY 2000 1000 %	TY 2001 1000 %	TY 2003 1000 %	Users 495 %	Non-Users 505 %

Do Not Have Access To Internet Via PC	37	31	29	25	24	26

# Tax Filing Dynamics

- The total filing dynamics data show one major change from last year -- growth in electronic Bal Due payments and refunds. These measures also show that Non-Users tend to file more complex returns, are more likely to be Bal Dues, and are less likely to use electronic payment/refund methods.

BASE: Used A Tax Professional To File Taxes In 2003	Total Random Sample		--Tax Year 2003--

# Summary Of Learning From The Taxpayer Satisfaction Study

Russell  
MARKETING  
RESEARCH

# What Did We Learn About Taxpayers & e-file?

---

## Overall, Satisfaction Study results among Taxpayers show...

1. **Continued high satisfaction among Users of each e-file product** -- with virtually all at least "somewhat" satisfied and with high levels of top-box, "very satisfied" of...
  - 77% for Practitioner e-file (higher among Tech Leaders and Followers but lower among Spanish-Speaking Taxpayers).
  - 81% for OLF (higher among the Tech Leader and Spanish-Speaking segments) -- with each OLF variant also at 80%+, including Free File at 83%.
  - And 90% (an all-time high) for TeleFile.
2. **Results also show improved levels of Repeat Usage this year vs. last.**
3. **However, there are still areas of improvement indicated for each product** -- specifically...
  - For Practitioner e-file -- *make it less expensive.*
  - For On-Line Filing -- *lower the cost, improve instructions, and simplify it.*
  - And for TeleFile -- *expand the qualification for it and improve its instructions.*

## What Did We Learn About Taxpayers & e-file? (Cont'd.)

---

### 4. Among Non-Users, we found that...

- 50% or more are interested in each e-file product (with a high of 60% for Free File -- measured this year in place of TeleFile).
- But, while Non-Users are clearly interested in Free File, they have substantial concerns about the other two e-file products -- concerns about:
  - Practitioner e-file being *better than other methods* and its *cost*.
  - And concerns about OLF's *ease of use, privacy/security*, and being *better than other methods*.

### 5. As these concerns/barriers to use are addressed, it must be kept in mind that e-file products have clear perceptual strengths among both Users and Non-Users which should be supported:

- **Speed in Filing**
- **Faster Refunds**
- **And Accuracy**

# Detailed Findings Among Practitioners

Russell  
MARKETING  
RESEARCH

# Analyzing The Practitioner Audience

---

- **In our review of satisfaction findings among Practitioners, we will focus first on Preparers who are Users of *e-file* and then on Non-Users.**
- **However, we'll also take a look at satisfaction among several sub-groups identified as opportunity segments in the Practitioner Attitudinal Study (to be presented later). These segments are:**
  - [Low-Volume Users](#) (those who file less than 50% of their Individual returns electronically). We'll compare them to the [High-Volume Users](#) (those filing 50% or more of their Individual returns electronically).
  - And the three Tech Acceptance segments:
    - [Tech Leaders](#) (Preparers who embrace and are enthusiastic about technology).
    - [Tech Followers](#) (who generally trust technology but are not early triers).
    - [Tech Laggards](#) (Preparers who do not reject technology per se, but have limited trust in it).
- **Finally, we'll review satisfaction data among the two cells of Big Two Preparers mentioned earlier.**

**Findings Among  
Practitioners  
Who Use *e-file***

User Satisfaction  
With *e-file* Products

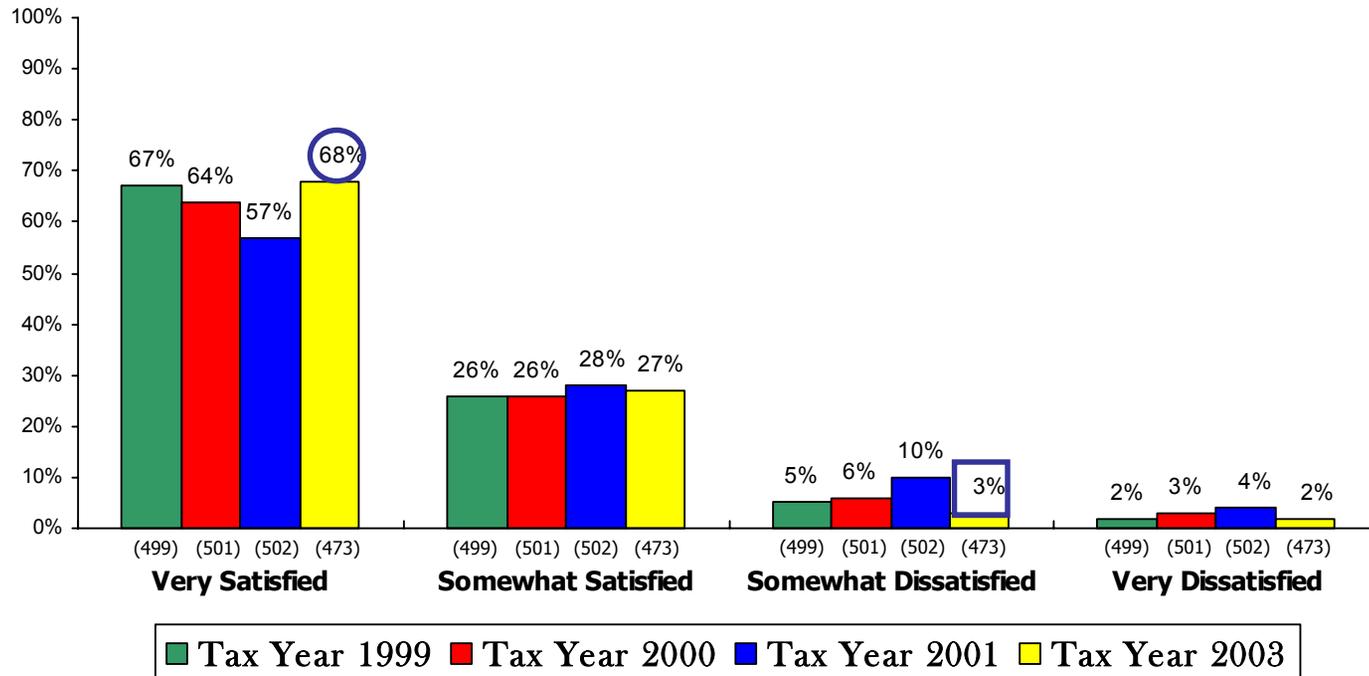

Russell  
MARKETING  
RESEARCH

## Satisfaction With IRS *e-file*

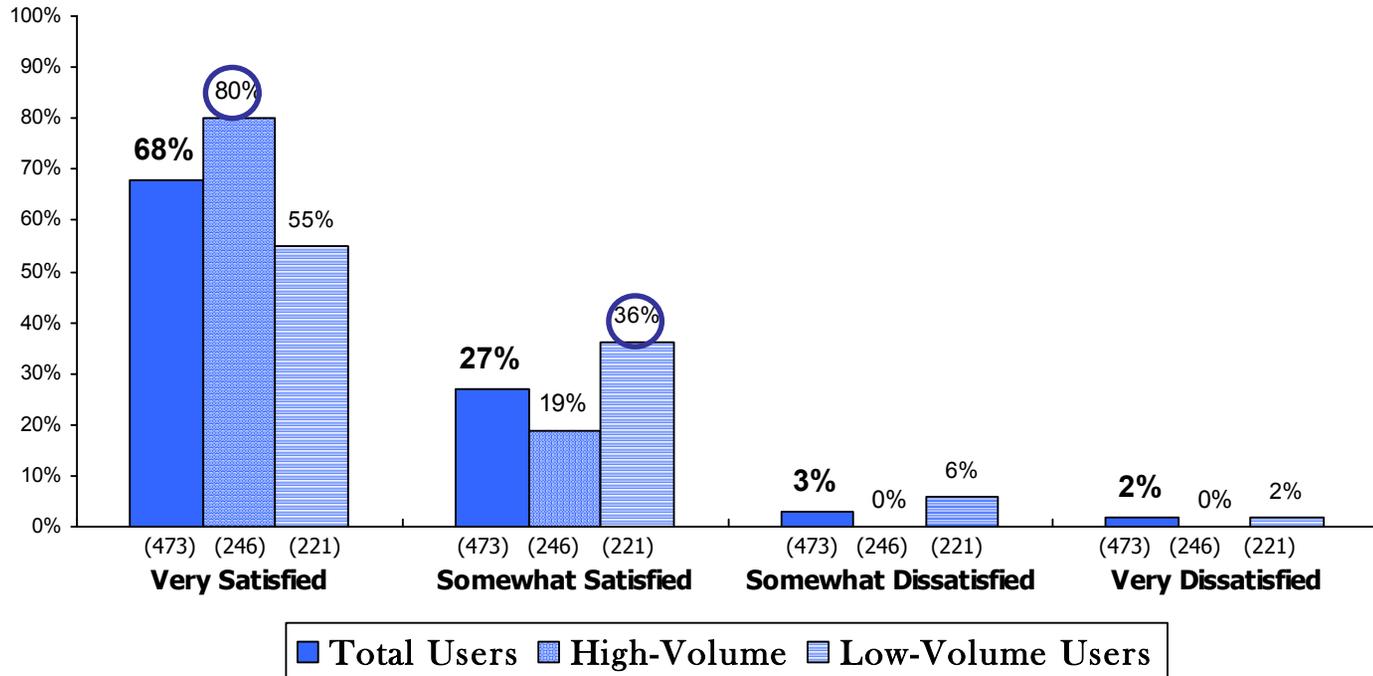

- Nearly all Users this year (95%) are at least somewhat satisfied with IRS *e-file*, and we see significant movement vs. last year out of the “somewhat dissatisfied” rating and into the top-box (“very satisfied”) rating.

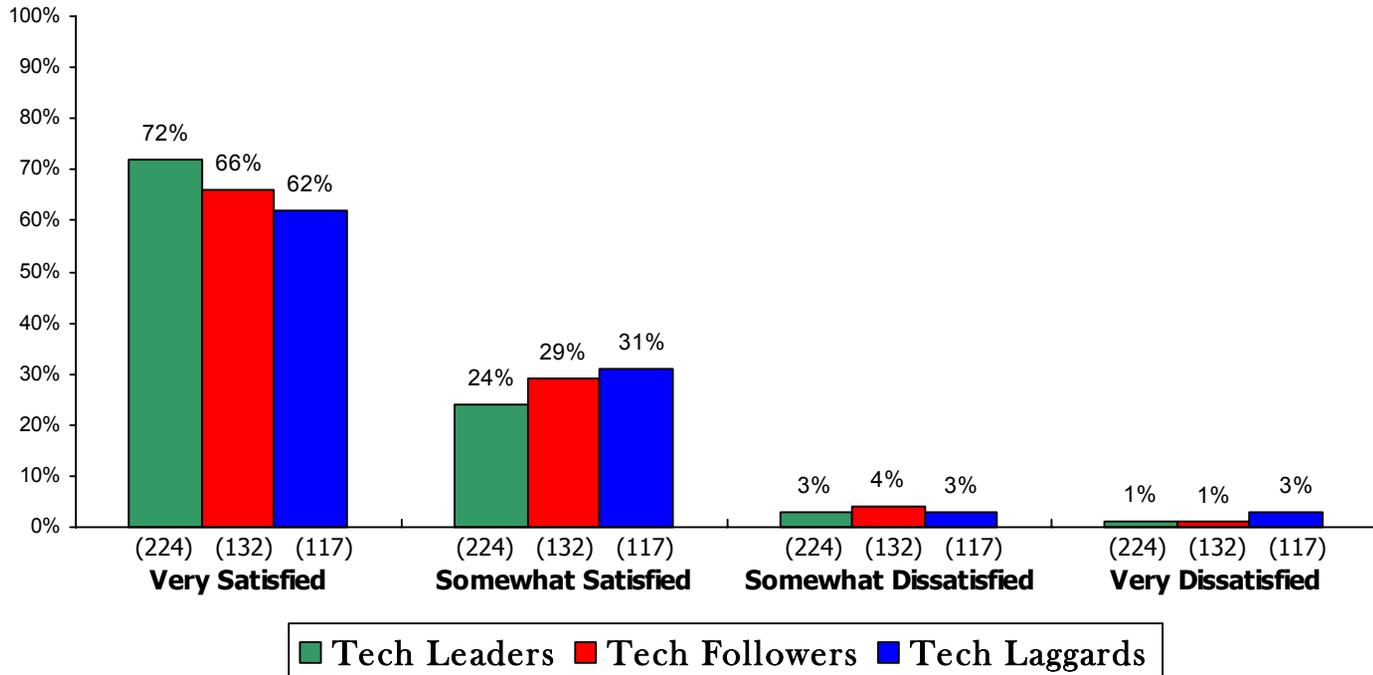

## Satisfaction With **IRS e-file** (Cont'd.)

- **Analysis of the satisfaction rating by e-file usage volume shows clearly stronger satisfaction among the High-Volume Users compared to Low-Volume Users -- especially in the top-box ("very satisfied") rating point.**

## Satisfaction With *IRS e-file* (Cont'd.)

- And, analysis of satisfaction among the three Tech Acceptance segments shows that the more tech-forward the Preparer is, the higher his/her level of satisfaction with *IRS e-file*.

## Why Low-Volume Users *e-file* Less

---

- We asked Low-Volume *e-file* Users why they do not file more Individual returns via *e-file* and, in their responses, we see what we often find among *Non-Users* in other studies -- that they blame it on their clients, saying that clients don't want it, don't ask for it, have to pay taxes (and don't want to hurry that), and that clients do not want to pay extra for it.

BASE:	Low-Volume Users (221) %
<b>Clients Did Not Ask/Don't Want/Request</b>	<b>44</b>

# What Brings Them Into The *e-file* Program, Keeps Them In

- Among all Users, we see (as in the past) that the attributes that bring Preparers into the program keep them in it -- ease/convenience, speed, customers liking *e-file*, reducing paperwork, etc. Interestingly, High-Volume Users' reasons for joining and staying in the *e-file* program relate more to *e-file's* benefits, while Low-Volume Users' reasons are externally driven -- by their customers and by a feeling that "it's the future".

## Satisfaction With IRS Tracking Of Reject Rates

- Users' level of satisfaction with IRS tracking of reject rates remains steady. As in previous years, the main reason for dissatisfaction is the desire for more information on why returns were rejected.

## Satisfaction With The Suitability Process

- **User satisfaction with the suitability process is also statistically stable, and with no differences by volume of *e-file* usage. The reasons for being less than “very satisfied” are again diffuse, with the top reasons being EFIN activation and transmission problems (but at only 5% mentions).**

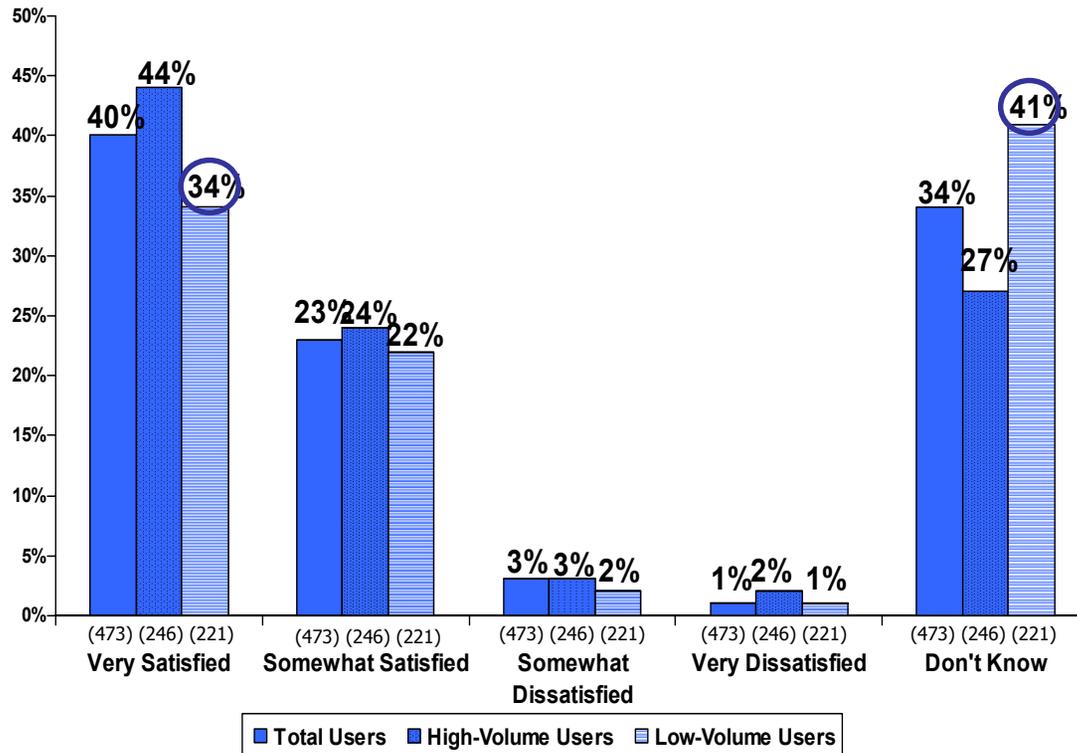

<u>Main Reasons Why Not “Very” Satisfied In 2003</u>	
	Users Less Than Very Satisfied
BASE:	74 %
Didn't Know EFIN Was Activated Until January Processing Start-Up	5
Knew EFIN Was Activated, But Could Not Transmit	5
All Other Reasons	51
Don't Know/No Answer	34

# Evaluation Of *e-file* Technical Support & IRS Assistance

- Most Users are also satisfied with IRS' technical support and assistance, with 2 out of 5 users being "very satisfied". One-third of Users are unable to evaluate the IRS on this measure (higher among Low-Volume Users).

### Service Or Support That Would Be Most Helpful

- An 800-number hotline
- Web/phone contacts
- Refund notification
- Explain rejections/errors in more detail

### What IRS Can Do To Make It Easier To Resolve Problems

- Provide more interpersonal support and communications
- Provide more contact information
- Let us know when we are getting the refunds
- Accept more/all forms
- Explain rejections/errors in more detail

## Whether Or Not Practitioner Is An ERO

- **78% of Users claim that they are Electronic Return Originators (or EROs), though this is sharply higher among the High-Volume Users.**
- **Within each usage volume group, the proportion of EROs who are new applicants in 2003 is virtually identical.**

	Total Users	High-Volume Users	Low-Volume Users
BASE:	473	246	221
<b>% Who Are EROs</b>	<b>78</b>	<b>94</b>	<b>62</b>

# Recall & Reaction To Form 8633

- Recall and reaction to Form 8633 was asked only among EROs this year. Among the EROs, we see that **73% recall Form 8633** -- with **90%** saying they **did not need assistance with it** and **80%** **having no suggestions for improving the form**. **85%** say they are **willing to put their e-mail address on the form**.

BASE:	<i>e-file Users</i> TY 2003 368 %

## Usage Of Tax Preparation Software

- e-file* Practitioners use a variety of software packages, with LaCerte being the most popular, especially among Low-Volume Users -- Drake is more popular among High-Volume Users.**

	Total Users 473 %	High-Volume Users 246 %	Low-Volume Users 221 %
BASE:			
LaCerte	21	14	29
Drake	13	20	5
Pro Series (Unspecified)	7	7	7

**Findings Among  
Practitioners  
Who Do Not Use *e-file***

# Previous Usage Of *e-file* & Reasons For Reverting To Paper

- Most Non-Users have never used e-file.** Among those who have used it previously, lack of client interest, the amount of time required, and expense are cited as the main reasons they reverted back to paper filing.

**Main Reasons Stopped Filing Electronically**

	Non-Users Who Previously Filed Electronically
BASE:	87 %
Clients not interested	29
Too time consuming	22
Too expensive	20
Too complicated	15
Cost Of Software	9
Cost Of Transmission	9

## Specific Dislikes Of The *e-file* Program

- We asked Non-Users why they dislike the *e-file* program and, as in previous waves, the dominant reasons relate to them believing *e-file* involves too much work or is complicated/difficult to learn and claiming a lack of client demand.

	TY 1999 <i>e-file</i> NON- USERS	TY 2000 <i>e-file</i> NON- USERS	TY 2001 <i>e-file</i> NON- USERS	TY 2003 <i>e-file</i> NON- USERS

# Suggested Ways The IRS Can Increase Usage Of *e-file*

- **Three-fourths of Non-Users have suggestions for the IRS in terms of how to encourage more *e-file* use. And, while specific suggestions are diffuse, a few emerge as more important: *simplify the process, eliminate or reduce the costs associated with the program, and provide more information.***

BASE:	TY 2003 <i>e-file</i> NON- USERS 500 %
<b><u>IRS Could Do Something</u></b>	<b>74</b>
<b>Simplify It/Make It Easier/More User-Friendly</b>	<b>13</b>
Add Ability To Do All Returns/Forms On <i>e-file</i>	6
Eliminate Signature Requirement	3

Make It Mandatory	4

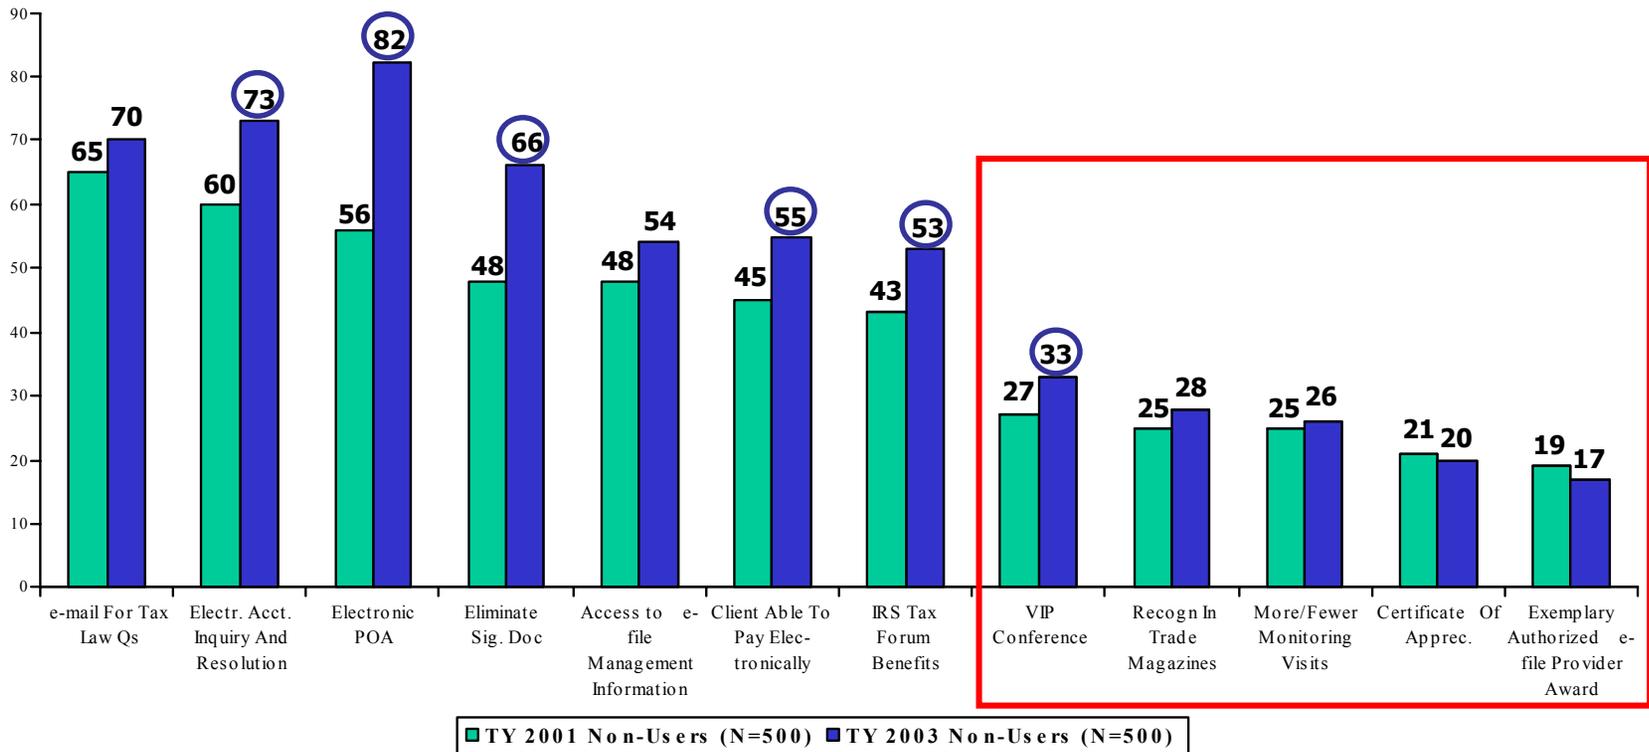

# Suggested Services/Support That Would Be Most Helpful

- **Similar to suggestions for increasing usage, Non-User suggestions for helpful IRS services/support include *simplifying the process, eliminating/lowering the costs associated with the program, and providing more information* would be most helpful to them.**

BASE:	TY 2003 e-file NON- USERS 500 %
<b><u>Something Would Be Helpful</u></b>	<b>40</b>
<b>Simplify Filing Process (Eliminate Steps)</b>	<b>7</b>
Make It Paperless	3

Security/Privacy Assurances	2
<b>Reduce/Lower Cost</b>	<b>3</b>
Quicker Returns	3

## Reactions To Possible Incentives To Use Of *e-file*

- Interest in purely functional/practical incentives -- such as electronic power of attorney and electronic account inquiry & resolution, increase significantly this year. Emotional incentives, such as recognition/certificates/awards, remain less motivating.

# Other Measures Among All Practitioners

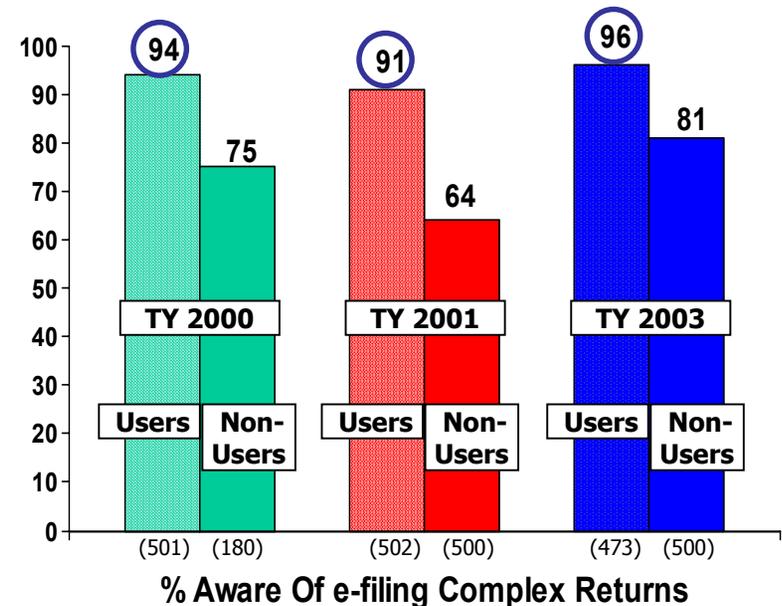

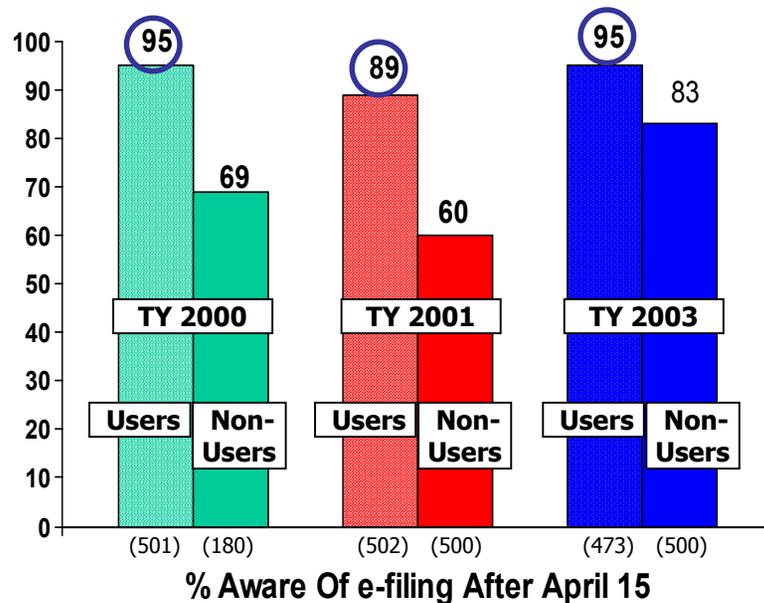

Russell  
MARKETING  
RESEARCH

## Awareness Of The Details Of The *e-file* Program

- As we found last year, Users are significantly more aware than Non-Users that they can *e-file* after April 15th and that they can file complex returns using *e-file*. The gaps between Users' and Non-Users' level of knowledge, though, are decreasing.

## Awareness Of The Details Of The *e-file* Program

- **High- and Low-Volume Users have similar levels of knowledge about the *e-file* program.**

BASE:	Total <u>Users</u> 473 %	High-Volume <u>Users</u> 246 %	Low-Volume <u>Users</u> 221 %
<b>% Aware Of <i>e-filing</i> After April 15th</b>	<b>95</b>	<b>97</b>	<b>94</b>
<b>% Aware Of <i>e-filing</i> Complex Returns</b>	<b>96</b>	<b>96</b>	<b>96</b>
<b>% Aware That Nearly All Individual Tax Returns Can Be Filed Using <i>e-file</i></b>	<b>96</b>	<b>98</b>	<b>96</b>

# Awareness & Interest In On-Line Registration

- While roughly one quarter of both Users and Non-Users are aware of the upcoming on-line application capability, Users are significantly more interested in using it -- with High-Volume Users especially interested.

BASE: Users Who Are EROs Who Recall Form 8633 & Non-User Non-EROs

	Total Users 272 %	High-Volume Users 174 %	Low-Volume Users 97 %	Non- Users 494 %
<b>Aware That They Will Be Able to Apply And/Or Revise Their Applications For The <i>e-file</i> Program Via On-Line Web-Based Application Within Next 9 Months</b>	27	28	24	26
<b>Interest In Using The On-Line Application Method In The Future</b>	87	90	83	54

# IRS Contact Preferences

- This year, about two-thirds of both Users and Non-Users say they prefer to be contacted by the IRS via *remote contact through a Practitioner or call site* as opposed to *walk-in/face-to-face contact*.**

BASE:	----TY 1999----		----TY 2000----		----TY 2001----		----TY 2003----	
	Users 499 %	Non-Users 358 %	Users 502 %	Non-Users 180 %	Users 501 %	Non-Users 500 %	Users 473 %	Non-Users 500 %

# H&R Block and Jackson-Hewitt Practitioners

## H&R Block and Jackson-Hewitt

- As expected, virtually all of the Preparers we interviewed from the Big Two tax prep firms say they are Users of *e-file*. So, we'll focus here on how they compare to our sample of Total *e-file* Users representing the universe of non-Big Two Practitioners.
- First, all H&R Block and Jackson-Hewitt Practitioners say they are at least somewhat satisfied with *e-file* -- similar to what we find among Total Users. However, when you look at the top-box ("very satisfied"), you see that there is far strong satisfaction among Big Two Preparers than other Preparers.

BASE: <i>e-file</i> Users	Total Users 473 %	H&R Block 228 %	Jackson- Hewitt 197 %
<u>Very/Somewhat Satisfied With <i>e-file</i></u>	<u>95</u>	<u>100</u>	<u>100</u>
Very Satisfied	68	← 86	88
Somewhat Satisfied	27	15	12

## H&R Block and Jackson-Hewitt (Cont'd.)

- While company policy plays a significantly more important role in their initial and continued participation in the *e-file* program, the H&R and J-H Preparers are also more likely to cite *e-file* benefits of speed and accuracy as reasons to join and stay in the program.

BASE: <i>e-file</i> Users	Total Users 473 %	H&R Block 228 %	Jackson- Hewitt 197 %
---------------------------	----------------------------	--------------------------	--------------------------------

### What Brings Users To *e-file* Program

<b>Company Policy</b>	<b>5</b>	<b>47</b>	<b>55</b>
Like Speed Of The Process	14	26	21
Like Accuracy Of Software	7	16	8

### What Keeps Users In *e-file* Program

<b>Company Policy</b>	<b>4</b>	<b>36</b>	<b>22</b>
Like Speed Of The Process	13	29	34
Like Accuracy Of Software	7	20	14

## H&R Block and Jackson-Hewitt (Cont'd.)

- Finally, in other differences we found among these segments, we see that the Big Two Preparers are more satisfied with the IRS tracking of reject rates and less likely to say that they are EROs (with someone else in their firm holding this responsibility).

BASE: <i>e-file</i> Users	Total Users 473 %	H&R Block 228 %	Jackson- Hewitt 197 %
<b>Very/Somewhat Satisfied With IRS Tracking Of Rejection Rates</b>	<b>87</b>	<b>93</b>	<b>96</b>
<b>% Who Are EROs</b>	<b>82</b>	<b>12</b>	<b>--</b>

# Summary Of Learning From The Practitioner Satisfaction Study

Russell  
MARKETING  
RESEARCH

# What Did We Learn About Practitioners & e-file?

---

- First, we learned that satisfaction with IRS e-file has increased significantly among Users over the past year** -- with 95% now at least somewhat satisfied vs. 85% before (and with top-box, "very satisfied", up from 57% to 68%).

  - We also learned that satisfaction varies by market segment, with High-Volume e-file Users more satisfied than Low-Volume Users and with satisfaction higher among those Practitioners who are more tech-forward.**
  - In line with the high overall satisfaction, we see strong satisfaction with all elements of the program** -- tracking of reject rates, suitability, and IRS technical support.
- As in past waves of the Customer Satisfaction Study, we find that the attributes which bring Preparers into the program are the same attributes which keep them in it** -- ease/convenience, speed, customers liking *e-file*, reducing paperwork, etc.

  - It is worth noting again that High-Volume Users' reasons for joining and staying in the e-file program relate more to e-file's specific product benefits, while Low-Volume Users' reasons are driven more by customer demand and a sense that e-file "is the future" (the latter being a point which might be useful in marketing to the Low-Volume segment).**

## What Did We Learn About Practitioners & e-file? (Cont'd.)

---

3. Among both the Low-Volume User segment and Non-Users, a critical barrier to use/greater usage is *lack of demand for e-file from customers*.
- While the IRS can create some customer demand via its communications efforts, it also needs to spur Preparers into helping to create the demand...
    - By finding ways to encourage them to offer e-file (and perhaps *free* electronic filing).
    - Some of the incentives-to-use explored here had high acceptance among Non-Users -- the top ones being Electronic Power of Attorney and Electronic Account Inquiry & Resolution.
    - Incentives should also help alleviate a major Non-User dislike of e-file -- their perception that taking on e-file involves too much work and time.
    - In addition, the fact that about 20% of Non-Users are still not aware of e-filing after April 15th or e-filing of complex returns suggests the need for more communication of these and other *e-file* benefits.
4. Finally, comparing H&R and J-H Preparers to our national sample of other e-file Users, we see that these Preparers are more strongly satisfied with e-file and more keenly aware of its benefits -- both points to be taken into account when considering whether to merge H&R and J-H Preparers with the rest of the Practitioner universe.
