How can I *e-file* and use the Self-Select PIN?

Use Your Personal Computer

A computer, tax preparation software, and Internet access are all you need to file your tax return and sign electronically. You can prepare and file your return completely on-line by using a tax preparation software package available on the Internet. Best of all, you can *e-file* your tax return from the comfort of your home anytime, day or night. Within 48 hours of filing, you will receive confirmation that the IRS has received your return for processing.

Self-Select PIN in Three Easy Steps

The tax preparation software will prompt you to enter a five-digit PIN. Any combination of five digits can be used, with the exception of all zeros (00000). If married, filing jointly, both spouses will need to create a PIN.

To validate identity, the software will prompt you to enter your Adjusted Gross Income (AGI) from your originally filed 2002 tax return. If married, filing jointly for tax year 2002, both spouses must enter the same AGI.

You will also be prompted to enter your Date of Birth (DOB). Make sure your DOB is accurate and matches the information found in your annual "Social Security Statement" provided by the Social Security Administration.
