

If You Make More Than One Tax Payment a Year, EFTPS is For You.

The Electronic Federal Tax Payment System—EFTPS is the easiest, safest, most convenient way for businesses and individuals to make federal tax payments via the Internet, using PC software, or over the phone. EFTPS is a service offered free from the U.S. Department of the Treasury.

Whether you're a business or an individual, with EFTPS you have the convenience of making your tax payments from your home or office, 24 hours a day, 7 days a week. The system is ideal for all businesses, and especially for Form 1040ES individual taxpayers that make quarterly estimated payments.

EFTPS gives you choices of how you want to make your tax payments.

You can use EFTPS-OnLine, EFTPS-PC Software, or EFTPS-Phone. It's easy to enroll and make payments on time using EFTPS.

You can schedule all of your payments in advance (120 days for businesses, 365 days for individuals), and you can make weekly or monthly payments if you prefer.

If you need to change any scheduled payments, you can—anytime up to two business days in advance of the settlement date. You can also access your tax payment history for up to 120 days online or by phone.

Every EFTPS transaction receives an immediate EFT Acknowledgement Number that serves as a receipt of the transaction, and is used for checking status, tracking and communicating with the IRS. Only tax information is sent to the IRS. All financial institution information resides within EFTPS and is not shared with the IRS.

EFTPS was introduced by the U.S. Department of Treasury in 1996

to provide a more efficient method for taxpayers to make payments. Today, more than 3.7 million businesses and individuals are enrolled in EFTPS.
