

Electronic Filing Option FOR Tax Professionals

IRS *e-file* offers an option to tax professionals and their clients for filing Form 1065, Schedules K-1 and related forms and schedules using a transmitter or an authorized e-file provider.

IRS *e-file* is easy to use, convenient, accurate and secure. It virtually eliminates late filing fees and penalties, and lost returns. To maintain the integrity of the e-file program, suitability checks are conducted on all e-file participants. As an added benefit, e-filing of business returns allows tax professionals and taxpayers to receive copies of all returns transmitted electronically and receive an electronic acknowledgement of all transmissions.

Beginning January 4, 2005, **Form T**, *Forest Activities*, **Form 970**, *Application to Use LIFO Inventory Method* and **Form 8886**, *Reportable Transaction Disclosure Statement* can be filed electronically.

Even if you are not required to file your return electronically, you may participate voluntarily. Take advantage of IRS *e-file*. It's the fast, easy and convenient way to get your taxes where you want them to be... done.
